Roche PMDA Summer School

Roche PMDA Summer School is a one-week in-person event for PhD students interested in applying their skills to tackle problems in drug discovery and development.

The summer school is organised and sponsored by the **Data Analytics** department, part of the Computational Sciences Center of Excellence of F. Hoffmann-La Roche Ltd, and the **Predictive Modelling** chapter in the Pharmaceutical Sciences department. Both teams develop and apply data analysis and modelling tools to support the value chain from target assessment to product launch.
